Appendix A: T Dwarf Candidates

A.1 Sample wdb0699

The following tables and figures provide information for the wdb0699 Sample, as described in §2.4.2.2. Table A.1 lists 2MASS photometry for all of the candidates in the sample and their current status; Table A.2 lists those objects unconfirmed in follow-up near-infrared imaging campaigns (§2.5.1), and possible asteroid associations; Table A.3 lists confirmed objects with either optical and/or spectroscopic follow-up and probable identifications; Table A.4 lists confirmed objects without follow-up observations, along with brief descriptions of their probable nature; and Table A.5 lists those objects which have not yet been observed. Finder charts for all the candidates follow in Figure A.1.

Table A.1: wdb0699 Candidates.

A.2 Sample rdb0400

The following tables and figures provide information for the rdb0400 Sample, as described in §2.4.2.3. Table A.6 lists 2MASS photometry for all of the candidates in the sample and their current status; Table A.7 lists those objects unconfirmed in follow-up near-infrared imaging campaigns (§2.5.1), and possible asteroid associations; Table A.8 lists confirmed objects with either optical and/or spectroscopic follow-up and probable identifications; Table A.9 lists confirmed objects without follow-up observations, along with brief descriptions of their probable nature; and Table A.10 lists those objects which have not yet been observed. Finder charts for all the candidates follow in Figure A.30.

Table A.6: rdb0400 Candidates.

^aBright star identifications from SIMBAD; optical source identifications from USNO-A2.0 (Monet et al., 1998).

Figure A.30: DSS, XDSS, 2MASS J, and 2MASS K_s images of candidates from the rdb0400 Sample. Images are nominally $5' \times 5'$, oriented with North up and East to the left. Candidate positions are indicated by $20'' \times 20''$ boxes.

A.3 Sample rdb0600

The following tables and figures provide information for the rdb0600 Sample, as described in §2.4.2.4. Table A.11 lists 2MASS photometry for all of the candidates in the sample and their current status; Table A.12 lists those objects unconfirmed in follow-up near-infrared imaging campaigns (§2.5.1), and possible asteroid associations; Table A.13 lists confirmed objects with either optical and/or spectroscopic follow-up and probable identifications; and Table A.14 lists those objects which have not yet been observed. Finder charts for all the candidates follow in Figure A.50.

Table A.11: rdb0600 Candidates.

^aBright star identifications from SIMBAD; optical source identifications from USNO-A2.0 (Monet et al., 1998).

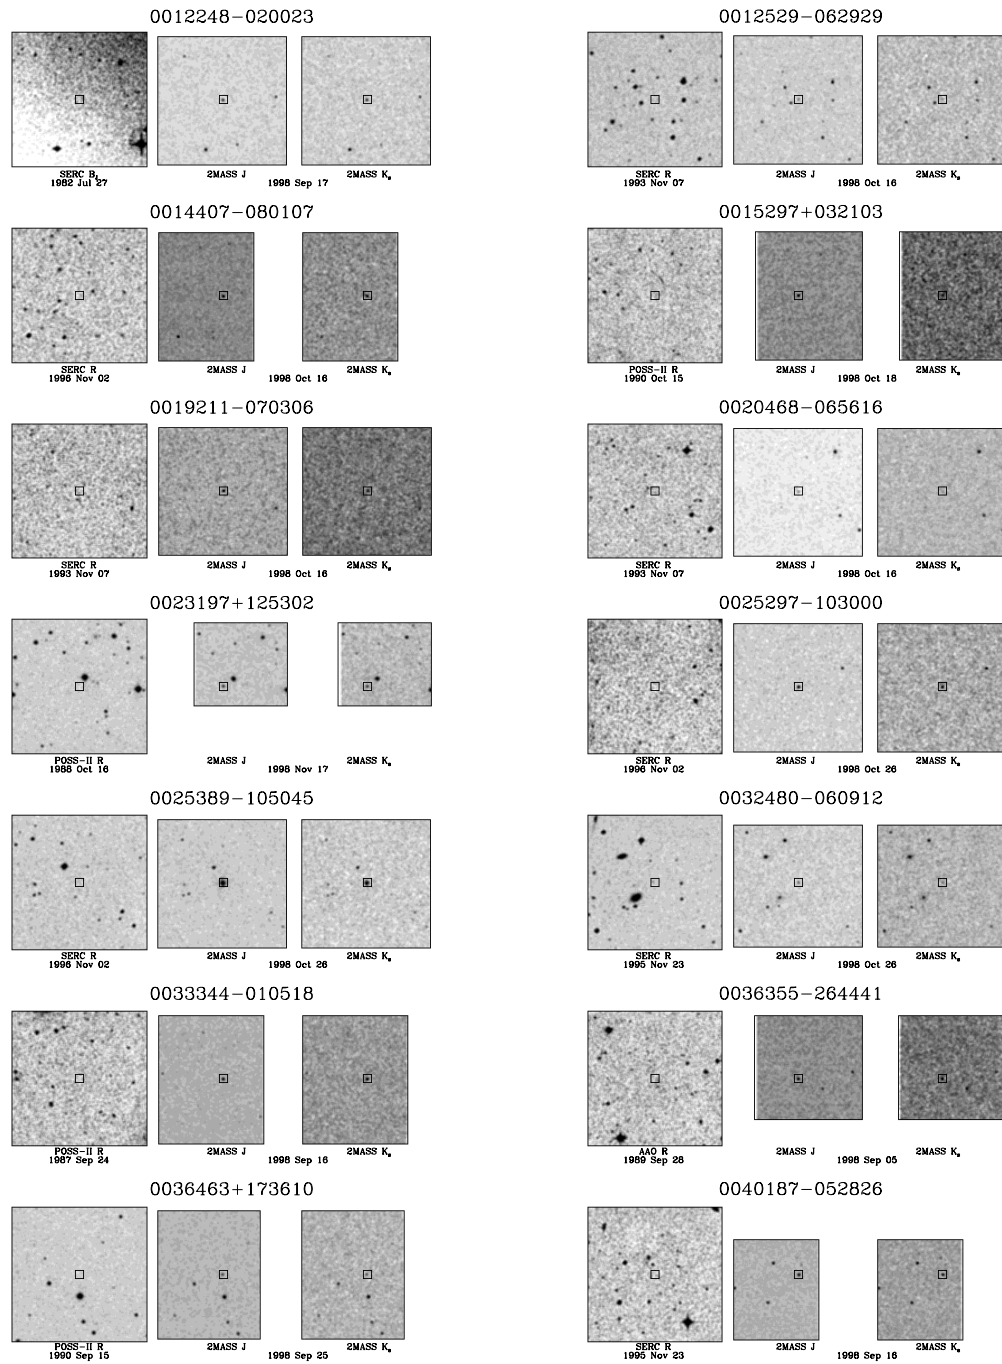

Figure A.50: DSS, XDSS, 2MASS J, and 2MASS K_s images of candidates from the rdb0600 Sample. Images are nominally $5' \times 5'$, oriented with North up and East to the left. Candidate positions are indicated by $20'' \times 20''$ boxes.
